

TOR Series Temp Recessed Value

Wide range of thermistor options Set-point & override options Rugged, low-profile design deters vandalism

DESCRIPTION

The T0R series is designed for use in energy management systems in buildings. The flush mount sensor housing accommodates a wide range of thermistor options for sensing room temperature. Optional set-point slider and override button can be added for additional control.

APPLICATIONS

- Room temperature measurement for building automation control
- Low profile tamper resistant design is ideal for schools and public areas

Optional Set-Point slider and Override Button

Gasket seals element from wall drafts. 45 degree terminals for ease of wireing

Buy American Act Certified

FEATURES

- Fits in any standard j-box or low voltage bracket.
- No exposed screws; unobtrusive tamper resistant design

K = 20K L= 100K
