

PR24 Series Power Relays 20A

20A range resistive rating
Smallest 20A package on the market
Hand Off Auto switch option
Current run-status confirmation option

DESCRIPTION

The PR Series power relays are ideal multi-voltage input pilot duty relays that mount to existing panels to control loads. External enclosures are not required making them ideal for interfacing loads with building automation control systems. Featuring the highest output in the smallest package, integrated current sensing, and a secure tamper resistant HOA. Highest 20A capacity in the industries smallest package.

APPLICATIONS

- Command contactors
- Control motors
- Isolation
- Device interlocking
- Relay logic
- Lighting load levels
- Great for data centers using Hand Off Auto (HOA) switch

Hinged HOA cover with tamper resistant screw

Typical wiring

Ideal multi-voltage input pilot duty relays that mount to existing panels

FEATURES

- Current sensor run status option
- LED indicator
- Multi-voltage coil input
- Hand-Off-Auto switch option
- Nipple mount to any electrical enclosure
- Flexible tinned stranded wire... fits easily in tight spaces and provides secure connections to wire nuts
- Versions with Hand Off Auto (HOA) switch feature with secure screw cover door to prevent tampering
- Eliminates costly system override-related service calls
